

Shooting partition parameters

1. Product composition: bulletproof glass, bulletproof steel plate, galvanized steel plate, bolt, LED light strip
2. Overall dimensions: 1230mm, 1470mm wide, 2275mm high (per group)

Bulletproof glass: size 1240mm wide, 1100mm high

Specification 8mm+8mm+8mm thick laminated bulletproof glass;

3. Bulletproof performance: Class H; The bulletproof rating is F79-H-J, which meets the requirement that steel core bullets with a diameter of 54 pistols cannot penetrate, there are no splashes on the back of the glass, and the light transmittance is $\geq 75\%$;

4. Steel plate: 6mm bulletproof steel plate (surface electrostatic spray military green), side support frame: 2mm galvanized steel plate bent and customized (surface electrostatic spray light gray);

5. Shooting table board: made of 2mm steel plate (surface electrostatic spray military green)
