

Shooting partition parameters

1. Product composition: bulletproof glass, steel plate, profile steel, hydraulic shooting table plate, universal wheel.
2. Overall size: 1450mm, 845mm wide, 1900mm high
3. Bulletproof glass: size width 1420mm height 1000mm; specification 8mm + 8mm + 8mm thick clamped bulletproof glass; elastic energy: Class H; bulletproof grade F79-H-J, 54 pistol bullet diameter steel core bullet cannot be broken, no splash on the back of the glass, and the light transmittance is $\geq 75\%$;
4. Steel plate: 6mm steel plate, steel plate surface anti-rust treatment;
5. Side support frame: 3mm steel plate bending customization, white paint on the surface to prevent rust;
6. Base support frame: 80-slot steel bending customization, white paint on the surface to prevent rust;
7. Hydraulic rod: center distance 400mm, travel 160mm, cylinder diameter 22/10, load-bearing 10-140kg;
8. Shooting table plate: 4mm steel plate, the surface of the table plate is covered with green anti-static rubber film;
9. Universal wheel: The size of the moving wheel is 6 inches, the adhesive material is polyurethane, the bracket is treated with a galvanized surface layer, and the overall load-bearing capacity is more than 5T.
